INTRODUCTION

Who are we?

In 2016, we started QACraft with the aim to provide software testing and automation services world-wide. QACraft is a software testing company based in Vadodara, India. We specialize in QA testing solutions across the globe.

Our goal is to help individuals and companies make their products excellent, smooth, and bug-free.

We believe in a diverse range of personnel to bring creative skills, thoughts, and ideas to the table.

What Do We Do?

With new innovations every day, we modify our testing models for your unique requirements and deliver optimized software and services.

We help our clients to integrate their business. We offer robust, flexible, and affordable testing solutions according to their business needs.

We work as a team where everyone is allowed to think and demonstrate the best solution they could apply for our clients testing projects and then we implement top-notch methods and technologies for testing.

Our Mission

Our main mission is to make products better, bug-free and increase customer business revenue. We also want to apply fast-growing automation technologies for our customers to make their repetitive tasks fast, robust and with the use of fewer resources.

Our Responsibility

We understand and take our responsibility seriously. We are responsible to provide the best QA and software testing services to our existing and new customers. We also make sure that we deliver everything on time with perfection.

CONTENT

What is Software Testing?

Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation. Test techniques include the process of executing a program or application with the intent of finding failures, and verifying that the software product is fit for use.

OUR QA SERVICES

Our Approach

We do not apply the same approach for all customers. As all customers have unique requirements, We change our approach depends on such requirements. Changing approach customer to customer enable us to achieve great results.

Automation Testing

QACraft has been one of the leading companies in providing automated testing services for all types of software and applications inclusive of mobile as well as web apps. Our expert team designs the QA strategy to check the various parameters such as functionality, speed, performance, quality, loading time and much more to give you a detailed report about the same.

Functional Testing

We have an elite team of experts who carry out various test trials to analyze the functioning and quality of the software. We recommend our functional testing services and solutions at the initial stages of software development to get the desired results when it comes to overall quality and functionality. The team works closely with the organization to develop an effective testing plan for your software.

Non-Functional Testing

While functional testing pays attention to improve the functioning of the software, our non-functional testing solutions aids in enhancing software performance under various conditions. Our expert team of engineers and testers strategize the testing procedure by paying attention to several criteria such as loading capability, response time, and end-user experience.

Mobile App Testing

At QACraft, we are proud to be ranked as the leading mobile application testing company in the USA. Our elite team can test all types of apps right from native to hybrid and web-based applications. With our in-depth review and correction strategies, you can provide your users with the apps with topnotch user experience and accelerate your company's growth.

OUR TESTING PLATFORMS

Our Opportunity

We have an opportunity to work with many clients across the USA, UK, and Australia. We have worked on testing different domains ranging from gaming, E-commerce, retail, banking and finance, travel, E-learning, and more. We ensure that we provide high-quality service to our clients.

Website Testing

Our team of experts help in going through all the vital factors and prepare a detailed report. The team lists down all the key parameters, the performance of your app in all such fields, and errors if found any. Our team also helps you and your staff resolve the issues and make your website more engaging and stable.

iOS App Testing

Our team of application testers helps in analyzing every aspect of your iOS app to improve the overall performance. Our iOS application testing services are highly appreciated due to our strategic plans for testing and covering every parameter that is crucial for an app to run smoothly.

Android Testing

As Android apps have become a valuable tool to target more audience and boost sales, it is vital to have an application that is robust, engaging and works efficiently with maximum capacity. We at QACraft test all the essential parameters of your android app to ensure that the application is up to the standards and works well to serve the purpose.

Desktop App Testing

Desktop application testing is equally important as website testing. It has to be tested with a different point of view and strategies. Our team of experts carries out several test runs for testing the overall usability of any desktop application right from the navigation of the app to front end usability to enhance the application experience for your customers.

TOP CLIENTS

We love our clients and they love our work. We are always providing the best and optimum solutions to deliver custom and accurate results. Here are some of our top clients and how they feel about our teamwork and quality of service.

CLIENT FEEDBACK

QACraft team went above and beyond to deliver the necessary scripts in a very timely manner. They communicate very well, even taking the time to have a call with me to step me through how to run the script. They make themselves available when you need them; time differences do not interfere with progress. I'm looking forward to working with QACraft for the long term; their efforts have been essential to automating my business and helping it grow.

- DANA

I've been with Rahul and his company QACraft for a few years already and I've depended on them for all my web testing needs. He has always demonstrated more than his competency and proficiency in addressing all my issues. And over the years the trust level has been extremely reassuring – which is very important.

- VINEET

“QACraft provides very professional QA services and we are really happy with the timely service they offered for our mobile app testing. Highly recommended.” - CHRISTY

“Rahul is easy to communicate with, always willing to adapt to new processes or systems, and very effective. As we've worked together, he's continued to improve in both functional QA and processes. I'd highly recommend Rahul and his team.” - THOMAS
